

Behavior Connect

The bounds of behavioral healthcare are virtually limitless with Behavior Connect. Capture behavioral events and **collaborate remotely** with healthcare professionals, teachers, and patients anywhere in the world. **Create and organize video libraries** of behaviors for training and research. Results oriented and easy to use, this **powerful Behavior Imaging™ application** is changing the way behaviors are treated.

Record better data to more effectively diagnose and treat behaviors

Data Capture Integration With Behavior Connect’s intelligent uploading system, upload digital behavioral data like video, audio, PDFs, photos, and other documents. Digitize paper documents by faxing them directly into Behavior Connect for secure storage and sharing. Use Behavior Connect’s Forms Tool to create custom forms using a wide array of existing templates to streamline paper-based processes and eliminate redundant paperwork.

Annotation Use Behavior Connect to create dynamic video records through annotation. Draw attention to behaviors and further enable collaboration by annotating specific instances on the video on a second by second basis. These annotations become part of the video record and can be referenced by specialists when the video is shared and played back.

Improve workflow and reduce travel costs

Secure Collaboration Send videos and other digital records securely to specialists, parents, teachers and other parties for review over a secure HIPAA and FERPA compliant email application built into Behavior Connect. The records can be sent anywhere in the world where there is access to the Internet.

Organizational Admin Tool An intuitive, web-based Admin Tool makes the management of users and the organization of digital data easy. Configure the Admin Tool to meet the demands of multiple users in sophisticated organizational structures. Create custom profiles and directories that will improve workflow, enable collaboration, and facilitate the exchange of behavioral data.

One-Click Capture and Auto Load Integrate with Behavior Capture for seamless recording and loading of video. Recording is activated with one click of a wireless remote control worn around the neck. Have the ability to react quickly and capture a behavioral incident on video while it’s happening. Once recording is completed, the video auto-loads to a computer desktop. No manual connection or file transfer is required to upload the video.

Optimize behavior training and research

Digital Media Library Store and manage an unlimited number of digital videos, files, and documents in a library with an easy-to-use, web-based user interface. Organize videos and create custom libraries of behaviors that can be used for training and research.

Reporting Behavior Connect integrates with Excel and other tools for easy reporting. Videos can be tagged with keywords to enable quick searches and grouping of videos into different categories. This type of metadata can be exported into a .csv file for quick import into a variety of reporting tools.

This is what we've been looking for to *train our staff and supervise our remote facilities* when our experts can't be in all places at once.

-Administrator, Health Service Agency

Benefits

- Reduce the need to travel by sharing data securely online.
- Eliminate labor-intensive paper-based processes.
- Save time through more efficient reporting.
- Expand the ability to use data to understand and treat behaviors.
- Review behaviors at times and locations that are convenient for staff and supervisors.

Behavior Connect Use Cases

Special Education

- Alternate Assessment reporting
- Behavior intervention
- Remote access to specialists
- Teacher training

Health IT & Military Health

- Remote consultation
- Medication management
- Telepsychiatry
- Remote training & supervision

Licensing Options

Option 1:

- License Behavior Connect Software as a Service (SaaS). Behavior Connect is accessed by users as a web-hosted solution.
- Includes: Regular software upgrade notifications and technical support for customers via phone and email.

Option 2:

- Host Behavior Connect on your own server.
- Solution is configurable to client's IT architecture and can be skinned with the organization's brand.
- Includes: Regular software upgrade notifications and technical support for customers via phone and email.
